Download the Mobile App

To download to an Android based device:

1. Go to: https://play.google.com/store.
2. Search for: **My Home StarLink**.
3. Click **INSTALL** to download free mobile app.

To download to an iPhone:

1. Go to: http://itunes.apple.com/.
2. Search for: **My Home StarLink**.
3. Click **INSTALL** to download free mobile app.
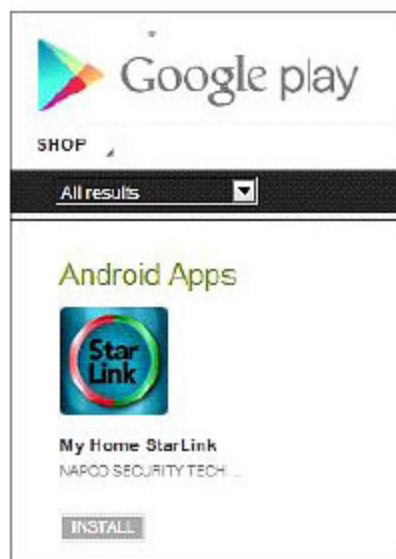

Setup the Configuration Settings in the Mobile App

1. Open the mobile app and press the **Settings** icon.
2. In the **Account No.** field, enter the 7 digit Radio ID#.
3. In the **Password** field, enter the unique password that was entered in the NapcoNOC password field.
4. Optional text may be entered into the **Description** field.

The **My Home StarLink** mobile app can control up to 3 different sites. In the **Settings** screen, click the radio button next to the site you wish to control.

The end-user's security system can now be armed and disarmed remotely by the use of the app screens shown above. Each time the mobile app is opened, the system will retrieve and display the current status of the control panel (the status may take a few seconds to display).
